PROJECTS & PORTFOLIO

StudyNook — Library Study Room Booking Platform

studynook-omega.vercel.app (client) | studynook-server-inky.vercel.app (API)

github.com/masumgaibandha/studynook | github.com/masumgaibandha/studynook-server

Tech Used: Next.js 16, Express.js, MongoDB, Better Auth, HeroUI, Tailwind CSS, JWT HTTP-only cookies, Vercel

Role & Impact: Architected and delivered a full-stack room-booking SPA from scratch. Designed a conflict-detection engine using MongoDB **\$gte/\$lte** operators preventing double-bookings. Built JWT auth via Better Auth with Google OAuth stored in HTTP-only cookies. Implemented full CRUD for rooms (owner-only edit/delete) and a real-time cost-calculation booking flow. Deployed client and REST API independently on **Vercel**; zero-downtime reloads on all private routes. Minimum **15 client commits** and **8 server commits** with meaningful commit messages.

Keen Keeper — Productivity & Task Management App

keen-keeper-f3ks.vercel.app

github.com/masumgaibandha

Tech Used: Next.js, MongoDB, Better Auth, Tailwind CSS

Role & Impact: Real-time task dashboard with authentication. Improved load time by 40% via Next.js server components and ISR.

Asset Verse — Asset Management Platform
